

ACATIS ASIA PACIFIC PLUS

AS OF: MARCH 31, 2018

Equity fund Asia and Pacific, flexible

MARKET COMMENTARY

The fund was down 2% for the month as against the benchmark which lost nearly 5% as a result of overall weakness in Asian markets. Our worst performer for the month was W-Scope a battery cell separator which lost 30% of its value during the month. Our best performer was Taiwanese health-drink manufacturer, Grape King, which gained 22%. Asian valuations though not stretched are going through a period of volatility after two years of good growth, we should continue to find opportunity as this volatility persists.

INVESTMENT OBJECTIVE AND - PHILOSOPHY

The title selection process for the actively managed special asset focuses on Asia (developed markets and developing countries) and also on Australia, New Zealand and Asian neighbouring countries, which are benefiting from the growth in this region in their role as suppliers. This process aims for broad and representative coverage. Shares are pre-selected on the basis of a quantitative screening process, and buying decisions are made following a thorough individual analysis. Management is supported by local research partners. The MSCI Pacific GDR (EUR) is used as a comparative index. The special asset does not intend to recreate the index, but rather aims for absolute value development that is independent of the index.
