

# ACATIS ASIA PACIFIC PLUS

AS OF: SEPTEMBER 30, 2018

## Equity fund Asia and Pacific, flexible

### MARKET COMMENTARY

The fund dropped 2.6% for the month mainly on account of its Indian Holdings. India witnessed a "mini Lehman" moment with the collapse of the infrastructure finance company IL&FS. This rocked credit markets and hit any stock with financing exposure. However all our holdings have rock solid balance sheets and are reporting strong growth in assets with stable margins. Piramal Enterprises, which was a strong performer throughout this year, dropped an amazing 27% due to the crisis we mentioned. This is a classic case of Mr. Market throwing the baby out with the bath water! Our best performing stock was Chinese battery maker BYD Electronics which rose 21%.

### INVESTMENT OBJECTIVE AND - PHILOSOPHY

The title selection process for the actively managed special asset focuses on Asia (developed markets and developing countries) and also on Australia, New Zealand and Asian neighbouring countries, which are benefiting from the growth in this region in their role as suppliers. This process aims for broad and representative coverage. Shares are pre-selected on the basis of a quantitative screening process, and buying decisions are made following a thorough individual analysis. Management is supported by local research partners. The MSCI Pacific GDR (EUR) is used as a comparative index. The special asset does not intend to recreate the index, but rather aims for absolute value development that is independent of the index.

### PRODUCT FACTS/ EMT

WKN	532030
ISIN	DE0005320303
Distribution	Dividends reinvested
Investment category	Equities Asia a. Pacific
Benchmark	MSCI Pacific -gdr-(EUR)
Currency	EUR
Total net assets	26.0 Mill. EUR
