

ACATIS IFK VALUE RENTEN UI (EUR)

AS OF: DECEMBER 31, 2017

Global fixed-income fund, aggressive

MARKET COMMENTARY

The fund gained +0.1% in December, for a total performance of +7.1% in 2017; it also outperformed the benchmark by a whopping 13.3%. The target of 3-5 percent growth per year has remained unchanged. Similar to the FED interest rates (currently 1.25 - 1.50%), we expect that the rates for the Bunds will normalise to 0.75 - 1.00% in the coming year. Since this still does not represent any value, it makes sense to keep an eye on the entire bond universe. Similar to 2017, new bonds will be issued in the coming year that do offer value, such as those of Schmolz & Bickenbach, which were issued at 5.625%, and that are currently priced at 107 or a yield of 2.5%. In addition, there are always trials and tribulations in individual stocks, sectors or regions, which will be identified as value stocks and incorporated into the portfolio in 2018. At Absolut Research, the fund is in 6th place of 312 (3 years - diversified bonds); 83 of the last 107 months were positive.

INVESTMENT OBJECTIVE AND - PHILOSOPHY

Assets under management are mostly invested in bonds of issuers selected on the basis of traditional bond analysis. The focus is on identifying value bonds that offer a particular yield advantage relative to their valuation. The fund therefore invests in a broadly diversified portfolio of undervalued bonds and focuses both on distributions in the form of interest and on capital gains.
