

ACATIS IFK VALUE RENTEN (USD)

AS OF: JUNE 30, 2018

Global fixed-income fund, aggressive, US-Dollar Hedge

MARKET COMMENTARY

In June, the fund was unable to escape the general market weakness of credits and foreign currencies and the tranche closed at -1.6%. All value stocks in the fund performed well in 2016 and 2017, with the return of +21% was achieved in one run from February 2016 to January 2018 (regarding the tranche). Therefore, we regard the current correction as natural and believe that it could further continue for about 1-2%. The NAV reflects the defensive purchase rates of banks, approximately 2% general market weakness, 1% Argentina and 2% foreign currencies outside the USD. We currently hold around 5% cash, which may calm nervous investors, and the carefully selected allocation of bonds is not affected. We remain committed to the fund's concept; even if - as in the last 9½ years since its launch - there are headwinds from time to time. With this approach, investors' capital has been doubled since its launch, in other words +101% earned since inception (+19% for the tranche).

INVESTMENT OBJECTIVE AND - PHILOSOPHY

Assets under management are mostly invested in bonds of issuers selected on the basis of traditional bond analysis. The focus is on identifying value bonds that offer a particular yield advantage relative to their valuation. The fund therefore invests in a broadly diversified portfolio of undervalued bonds and focuses both on distributions in the form of interest and on capital gains. The net asset value of the US-Dollar share class is hedged against the currency of the flagship class.

PRODUCT FACTS/ EMT

WKN	A1W9BC
