

ACATIS IFK VALUE RENTEN (USD)

AS OF: MARCH 31, 2018

Global fixed-income fund, aggressive, US-Dollar Hedge

MARKET COMMENTARY

The tranche was not able to remove itself from the general market weakness and closed the month of March with a performance of -0.2% (i.e. -0.3% since the beginning of the year). After an upward trend lasting 24 months and a performance of +23%, a correction was certainly expected and may still last a bit longer. The defensive buying rates of the banks are included accordingly in the NAV. This has the effect of increasing the yield in the portfolio, and the same income is locked in until the final maturity of the bonds - it is just distributed differently. The average value of the securities in the portfolio is approximately 102. In contrast to the rating agencies, we prepare our analyses until final maturity, not just for three, six or twelve months. At Absolut Research, the fund is in 5th place of 304 (3 years - diversified bonds). 33 of the last 50 months were positive.

INVESTMENT OBJECTIVE AND - PHILOSOPHY

Assets under management are mostly invested in bonds of issuers selected on the basis of traditional bond analysis. The focus is on identifying value bonds that offer a particular yield advantage relative to their valuation. The fund therefore invests in a broadly diversified portfolio of undervalued bonds and focuses both on distributions in the form of interest and on capital gains.
