

ACATIS IFK VALUE RENTEN (USD)

AS OF: AUGUST 31, 2018

Global fixed-income fund, aggressive, US-Dollar Hedge

MARKET COMMENTARY

In August, the tranche was not able to remove itself from the general market trend and closed the month at -2.1%. Beginning in February 2016, it generated 23% in one run within a period of 23 months. Therefore we believe that the current correction makes sense, even if it is painful and might still involve another 1-2%. This is one of three corrections since 2008. Every time, one asks whether the price will go up again. We are confident, because bonds are paid back 100% at maturity, barring a default. The default rate for the fund was 0.7% during the last nine and three-quarter years. Our analysis is different from the rating agencies, which normally just prepare analyses and ratings for 3, 6 or 12 months. We, on the other hand, perform an analysis for the final maturity. If we take the approximately 5% yield in the fund times three years, with a possible default rate of 2%, hence almost three times as high as in the last ten years, we obtain a capitalised earnings value of approximately 13%. Absolut Research ranked the fund in 11th place out of 302 (three-year diversified bonds).

INVESTMENT OBJECTIVE AND - PHILOSOPHY

Assets under management are mostly invested in bonds of issuers selected on the basis of traditional bond analysis. The focus is on identifying value bonds that offer a particular yield advantage relative to their valuation. The fund therefore invests in a broadly diversified portfolio of undervalued bonds and focuses both on distributions in the form of interest and on capital gains. The net asset value of the US-Dollar share class is hedged against the currency of the flagship class.

PRODUCT FACTS/ EMT
